

Implement a program on method of constructor overloading

```
class Overload
{
    public static void main(String args[])
    {
        System.out.println(Add.add(5,15));
        System.out.println(Add.add(2.63,5.98,9.55));
    }
}
class Add{
    static int add(int a,int b) {return a+b;}
    static double add(double a,double b,double c) {return
a+b+c;}
}
```

Output:

20

18.16

```
C:\Windows\System32\cmd.e  X + v
