Implement a program that demonstrates the concepts of class and objects
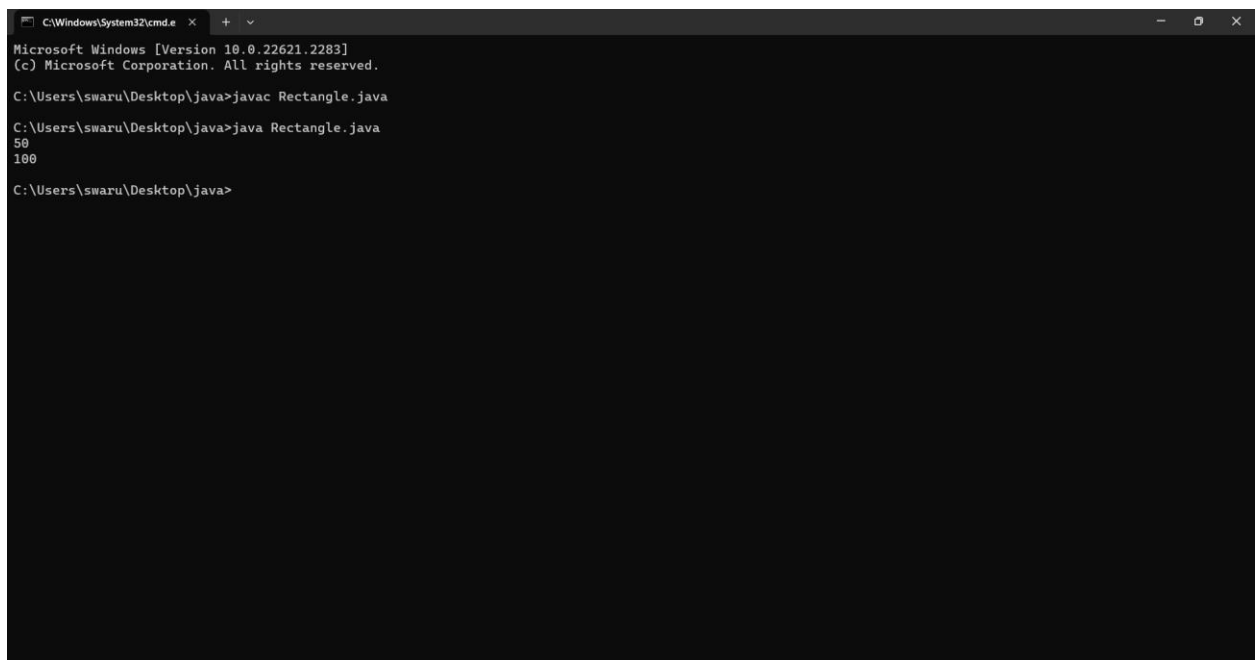

1)

```java
class TestRectangle1{
 public static void main(String args[]){
  Rectangle r1=new Rectangle();
  Rectangle r2=new Rectangle();
  r1.insert(10,5);
  r2.insert(20,5);
  r1.calculateArea();
  r2.calculateArea();
 }
}
class Rectangle{
 int length;
 int width;
 void insert(int l, int w){
```

```java
    length=l;

    width=w;

  }

  void

calculateArea(){System.out.println(length*width);}

}
```

Output :

50

100
